PROCESSOR DIAGNOSTICS

X-RAY

QC Pal

The **ESECO-Speedmaster QC Pal** software offers superior monitoring and tracking of your processor's performance and other important tasks. Equipped with diagnostics this software will examine and provide a list of likely problems for an out of tolerance processor. The software monitors and tracks the everyday changes of an unlimited number of processors. This program allows you to set scheduled tasks such as morning set up and monthly maintenance checks. It gives you the ability to input control strips readings through a serial port on your computer saving you the painstaking task of entering multiple numbers.

Using the **QC Pal** software along with the **SL-2** Sensitometer and the **SM-10T** Densitometer allows you to have complete and accurate quality control. This efficient system promotes image quality in a cost effective manner.

CAT # 5019 \$295

Features:

- Works with Windows 95, 98, 2000, ME, NT, and XP
- Works with any densitometer providing serial output
- User defined tolerances for each processor
- Monitor and plot an unlimited number of processors
- Processor control diagnostics
- Crossover procedure for changing from one lot of film to another
- User defined schedule tasks
- Shows plot history for the last 14 days
